LAB VISIT -KNOW YOUR LABS23/02/2022

Know your Labs . Visit by our Students of School of Architecture , COET to Material Testing , Soil Mechanics and Fluid Mechanics Laboratories at our Premises . An Endeavour to Interdesciplinary Exchange of Knowledge

students of architecture 1st ,third , fourth year students visited civil engineering lab. on 23 feb 2022.

Prof Watile Sir Civil Engg. Dept Explained students regarding different Machinaries and how to check strength of concrete in Lab.

MODEL MAKING 22/02/2022

Model making workshop was arranged on date 22 feb. 2022

Prof Ar Mundiwale Sir given demonstration on contour making on site. Model making for site at lonar for art center was done by students. Students of second year and first year B, arch actively participated in model making.

CONCEPT OF CONSTRUCTION MANAGEMENT BY SPEAKER - AR. KARTIK KULAT

23rd February 2022

We are happy to arrange a Guest Lecture on Topic - Concept of Construction Management by Speaker - Ar. Kartik Kulat at 11.15 a.m. on 23rd February 2022 at Audio Visual Hall, SOA for 3rd and 4th

Year Students.

Arch-Ditional-22

Day & Date: Monday - 4th Apr 2022

At the School of Architecture COET Akola on the 4th of April, an event of joy and happiness was conducted where people from first to last year, and even the staff persons involved with equal interest. ARCH-DITIONAL-22 is a Traditional day held in the School of Architecture on April 4 with many smiles and tears of happiness.

Arch-Ditional-22

The day started and each and every one entered in traditional costume; this brought a different look to the institute. The organizing team was ready with a whole day plan and full of energy, at 11 AM chief guest arrived. The dignitary is Avinash Gavande, He was greeted with a bouquet and he lighted up the candle and cut the ribbon, officially Arch-ditional was started.

The day was divided into 2 halves one was a quiz and another was Treasure Hunting. 4th Year enthusiasts held a wonderful quiz with lots of tricky questions with deep knowledge, this gave everyone a brainstorming start for the day. There were many refreshments was arranged by the 3rd year organizing team they provided a soothing and relaxing experience with their hospitality. Now here comes a fun and most awaited event called Treasure hunt.

2nd organizer created a wonderful and yet difficult clue finding race held between 8 teams.

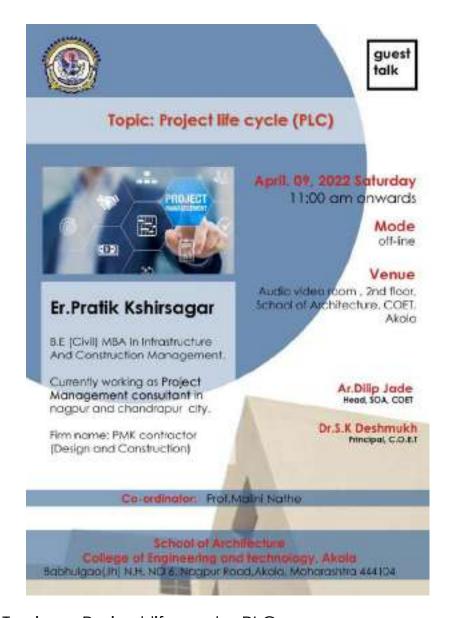

This event gave a full energetic and full of entertaining experience not even for the participated teams but for the spectators. This brings an end to the traditional day; all the winners got their prizes and all others got such a great experience. An amazing click with the whole School of Architecture family ends the day.

ABOUT THE INSTITUTE:

College of Engineering and Technology, Akola is one of the oldest institutions runby Shri Shvaji Edwarton Society, American, which is the second largest Edwartonal Society in the Maharashtra. The institute engaged in education, applied research, training and commitmery sections which focuses clearly on Engineering Education. This institute is established in 1983 and is efficiented to Sant Gadge Bobs American University, American and Accordined by NAAC with 'A' Grade Highly qualified stoff & stable faculty in the send of the college which in always after the overall development of students. Brand runse, depth of knowledge, discipline and cowall development of students under it possible for them to excel in their ventures.

ABOUT THE DEPARTMENTS:

Department of Mechanical Engineering was established in 2011 to gazing new height in different dimensions every year. All of the educational programs in the department prepare students for professional practice in an era of rapidly advancing technology. They combine a strong base in the engineering sciences, mechanics, materials, finid and thermal ociences, systems and control with project-based librarium; and design expensences. All strive to develop independence, meative takent, and leadership, as well as the capability for continuing professional growth.

Department of Chemical Engineering was established in 1983 and accordated by MBA and MAAC. The department is offering UG, PG, and Ph.D. under one spot! All the laboratories of the department are recognized for research by SGBA University American. The department have a professional chapter of Indian Plastics Institute (IPI) Mandon. The department have alroady Alaum interaction or well as industry interaction resulted into industrial consultation joint project, MOU, Training and Planement of Andrews.

RESOURCE PERSONS:

Experts from different specializations will be delivering between in various sections. Each Lecture will be followed by interactive sections on the subject matter.

SCOPE OF THE COURSE:

Low cost automation is the untroduction of sample parametric, hydraulic, mechanical and electrical devices into the stricting production machinery, with a view to improve their productivity. These would also enable the operation of these egoporest by even semi-skilled and unchilled labor, with a little training. This will involve the use of standardized parts and devices to mechanize or automate machines, processes and system.

The main sum of low cost automation is to increase productivity and quality of production and reduce the cost of production. The program is assert for extensive study of all the components of Low Cost Automation. It will help updating knowledge of the participants.

COURSE CONTENT:

- Importance of Low Cost Automation in Industry
- Basics of Hydraulic System Design
- Design of Hydraulic Systems for Industrial Application.
- Design of Presumatic Systems for Industrial Application.
- Design of Research Experimentation for Low cost Automation System.
- . Role of PLC in Low Cost Automation.
- Denien of PEC Automation System considering Low Cost Solution.
- Methods of Circuit Design for Postmatic Systems.
- Prochest Session to Study Poeumatic and Hydraulic Systems.

REGISTRATION FEES:

- Faculty Research scholars: Ro. 300/-
- · Industry professionals: Rs. 300/-

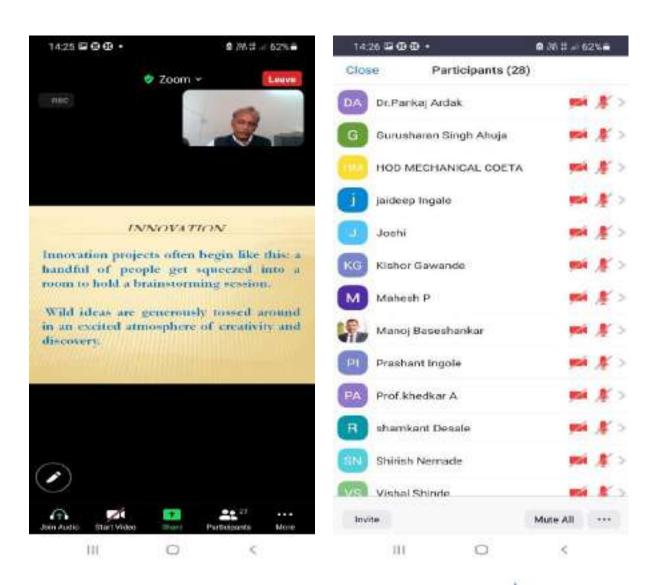

Now. The ISTE members will get ISTE & Configure. The non-ISTE members will get hunting local E-Configure on attenting the complete STTP program.

HOW TO APPLY:

All interested contributes are required to register on Google Form link given below by paying face of Ro 300° online through Coogle Pay / PhonePo on +91 9970271328 (Prof. Sodhar Dhomane)

Concept Note:

The world is changing rapidly into a more complex, fragile and uncertain place. We have realized all inherent weaknesses of our social fabric during this pandemic. The COVID-19 pandemic has put a question mark on the very notion of modernity, progress and development. As the coronavirus pandemic surges, infecting tens of thousands in almost every nation on the planet, engineers and scientists across industry and academia have played an integral role in preventing, treating, and testing for the disease. Facing this unprecedented crisis in human history, several research groups, industries and governments have been spending efforts to develop vaccines and medications. Professional from distinct areas including virologists, immunologists, epidemiologists, oncologists, biotechnologists, chemists, biochemists, bioinformatics, among several others, have been working hard against the COVID-19. People from distinct knowledge fields are doing their part in order to overcome this crisis. Chemical Engineers are also contributing in the development of actions to control the SARS-CoV-2 virus.

The main goal of each one of these sections was to familiarize the reader with the most important researches on COVID-19 and the topic in question, also to provide the reader a direction guide by providing current research in these areas. Our main goal is that the present review serves as a source of information for researchers, professors, professionals and students of Chemical Engineering and related areas. The proposed conference is a humble initiative to provide a platform for sharing ideas, experiences, and best practices in the field of Chemical Engineering. In addition to this, it aims to provide an opportunity for collective discussion and debate for advancement and solution for such pandemic situations. The knowledge generated thereof could be collated for the betterment of future policies and practices in educationalinstitutions.

Sub-Themes:

- Recent Advances in Chemical Engineering
- Energy Technology
- Environmental Engineering
- Waste Management
- Bio -Technology & Bio -Materials
- Sustainable Material
- Risk and Safety Management

Report of Work shop on "Relationship & Responsibilites" Organize by First year Engineering Dept. & ISTE Chapter On 16/02/2022

Department of Applied sciences, Humanities & Gen. Engineering (First Year Engg.Dept.) and ISTE chapter jointly organized an Workshop on "Relationship & Responsibilities" on 16/02/2022 for the newly admitted students in First year Engineering. Mr. Shirish Wanjara was invited as a resource person to delever an expert talk in this workshop. Dr. S. N. Naikwad, Member of First year monitoring committee chaired the inauguration of the workshop, Speaker Mr. Shirish wanjara , Dean academic of college Dr. G. S. Zamre and the other digitories graced the function.

The main objective of this workshop to aware the budding engineeres about their social resposibilities . In the First session of this workshop Dr. P. D. Bhanawat elborate about the aim and objectives of this workshop. The main speaker Mr. Shirish wanjara had lightened with present sceario and the psychology of the students and young generation in second session. It was our pleasure to invite you to conduct Workshop on Opening Minds to Universal Design Thinking & Accessibility jointly organized by School of Architecture & IIA Akola Centre, Akola.

You have very well elaborated the issues about accessibility and opened their minds.

The workshop was quite interactive and well received by Students & Architects. I strongly feel that our objective of sensitizing the Students and Architects about Universal Design & Accessibility has been achieved.

We are thankful for your co-operation and hope for future endeavourers.

Thanking you.

OPENING MINDS TO UNIVERSAL DESIGN THINKING – A ONE OR TWO DAY WORKSHOP

Universal Design is an inclusive concept and design approach that caters to needs of diverse kinds of users in the society irrespective of their individual differences to maximize usability of products, services and the built environment. The current convention and process of design is based on the needs and abilities of a non-existent hypothetical standard user, which leads to designs that do not incorporate the universal design and inclusive concepts, thus creating disabling environments for some ignored user groups like for instance people with disabilities.

The proposed workshop aims to introduce to the next generation of budding architects and designers, the concept of 'Universal Design' or 'Design-for-All', a relatively new design paradigm that extends far beyond the bias on the able-bodied in architecture. It is designed for students to widen their scope of the conceptual architectural thinking and strengthen their design skills to achieve social sustainability through design by addressing needs and abilities of all sections of the society.

The workshop is carried out in three phases: theoretical, practical and creative.

In the theoretical phase, students are given a discourse on What ? Why ? How ? of Universal Design through a very interesting lecture and audio visual presentation citing numerous examples of best practices and design guidelines for making buildings/ campuses universally accessible.

In the practical phase, students are placed in the role of a person with disability by moving around the campus of their own institute using assistive aids, such as wheelchairs and crutches, as well as being blindfolded. They observe and document obstacles as well as their experiences which are eye-opening in nature and insightful. Going through such a simulation adds immensely to their understanding of the importance and nuances of Designing for ALL.

In the last and creative phase of the workshop, student teams are engaged into intense brainstorming and innovative thinking for designing enabling environments that best suit the needs and abilities of different types of user groups. The ideas and solutions generated through such collective thinking and discussions are then presented by respective student teams in a time bound session.

Workshop conceptualized and conducted by:

DESIGN REVIEW: SOCIAL HOUSING

Architecture design is a continuous activity which is going on back of the mind even after we are not involved in that. Same as the case, students of Fourth year B.Arch. was undergo the Design Project Social Housing on site located at Jalgaon (khandesh). Students prepare the wonderful solutions from their minds for EWS, LIG and MIG housing with other activitites encorporating in to the site like Commercial Complex, Primary School, Weekly Market, etc. To judge their design proposals, the Subject incharge Prof. Anand Pande & Prof. Sudhir Dhomane invited Ar. Sarvesh Kela, Environmental Planner, from Akola on 28 March 2018 to review students Design Project as he is currently working on these types of Housing and Townships. During the Jury he asked the students about services involved in the site like, Sewage disposal, Road network and how they are dealing with the contours and gave his remarks regarding contour analysis and its planning.

Students face the Design Review in front of Ar. Sarvesh Kela with Prof. Sudhir Dhomane & Prof. Anand Pande
