Quality audits on environment and energy

Our Institutes take initiatives for the environmental promotional activities and spreading awareness and importance of Green Energy. As a part of green energy awareness program our institute welcomes Energy Swaraj Yatra and interact with them and understand the concept of Solar Energy.

Plastic Waste Management:

One of the consequences of using excess plastics is generation of plastic waste, especially through products which are of single use. The invention of plastics came as a blessing, but single-use plastics or those uneconomical for collection and recycle, in association with lack of awareness, has resulted into its littering and finally reaching marine environment from land-based sources. Our institution has deep concern to protect environment, health and well-being through implementation of effective waste management practices such as segregation, recycling, and composting. The initiative taken is not only to heal the environment but also to make responsible generation by giving the knowledge to students.
